- Music

PROFESSIONAL PROFILE

A highly motivated programmer who graduated with honors from Ruppin College, seeking an entry-level position in the software industry.
Possessing a strong passion for programming and a dedication to the field.

PROJECTS

Learning app - "pelet"

an application designed to assist beginner programmers in learning the basics of programming.

features: a Programming Calculator, Code Simulator, and classes with the ability to mark challenging classes for later review or to mark completed classes.

Technologies:
 React JS, electron (frontend) and SQL, C# (backend).

Home Arrangement app - "HomeArranger"

An app for organizing and cataloging items within a household.

features: allows users to create virtual rooms and add items to them, each with its own information and photo.

example: in the "kitchen" room, there could be an item called "matches" located in the "first drawer" (with a photo).

Technologies:
Java (frontend and backend) and Firebase (database).

EDUCATION

Ruppin Technological College, Practical Software Engineer

2020-2022

Graduated with Honors.
